Drawmaker Express taking Bowls Software into the 21st Century

Drawmaker Express is based on the original Drawmaker software sold to over 150 bowling clubs throughout Australia, between 1990 and 2013. Drawmaker Express contains a number of important improvements to the original Drawmaker software:

1. All bowler and team names are stored in a database for easy access for inclusion into any event.
2. All reporting is consistent with Windows based products, including the ability to save reports as PDF's for emailing out to club members.
3. Team names can be changed or added even after a draw has been produced.
4. A3 printing is available for some Tournament and Knockout events.
5. All names can be changed even after a draw has been generated.
6. A banner is positioned at the bottom of the scoring module's summary report designed for display on a large screen monitor. This banner can be used to advertise sponsorship and fun raising events. Team scores can also be displayed on this screen in large print, the instant they are entered.
7. Draw statistical reports can show details of any club or rink duplications.
8. All names printed in first name + surname or surname + first name order.
9. Import names and contact details from spreadsheets & databases.

Tournament

a. Ability to split the draw into two separate draws, running at the same time. Example: women's and men's competitions running on the same day.
b. Ability to have up to 4 byes in any round. This is ideal where you have more teams than rinks available, or where there are odd numbers of teams.
c. Ability to split the teams into sectional groups and then control which green a particular group plays on. Ideal where there is at least one synthetic green.
d. Ability to produce blank draws and then add teams later. This is ideal for club events where team numbers are drawn from a hat.

Knockout

a. Ability to enter results for each round and then to produce an up to date draw, ready for the next round.
b. Ability to change names before and after the event has started.

Sectional

    a. Ability to include byes in any draw.

Database features

    a. The bowler database can store up to 100,000 names.

    b. Able to keep contact details in sync with club membership spreadsheets & databases.

    c. Able to backup, restore or merge two databases into a larger database.

    d. Ability to sort and filter the database, so that only certain categories of bowlers are displayed for selection.

    e. Ability to print bowler listings with or without contact details.

    f. A bowler can be located and selected using a search facility where only the first few characters of the name need to be entered.

Discounts available

    a. Clubs, who have purchased Drawmaker products before 2014, may be entitled to a generous loyalty discount.

    b. The size of the discount depends of the products previously purchased. The largest discount applies to the scoring module.

    c. You must obtain a loyalty discount code and enter it when you purchase Drawmaker Express. Contact Ken Mattingley at ken@easyusesystems.com.au   to obtain your club's loyalty code.

Demo version of Drawmaker Express

    a. The demo contains all the features found in the full version of Drawmaker Express.

    b. Feel free to go to the Easyuse Systems P/L website and download the free demo. Website: www.easyusesystems.com.au
